

Jupiter Updated

- **No More Weekend Work:** No more pile driving will occur on weekends. In the future it's possible MCE may need to do occasional conduit work on Saturdays, but this work will not be noisy and will be properly noticed to the township and neighbors beforehand.
- **Set Daily Hours:** Crews have confirmed they will limit pile driving to 8am to 5pm on Monday through Friday until the work is completed (early May, weather permitting).
- **Light Mitigation:** MCE has confirmed they will stage their equipment at the end of each day to face away from neighboring residences along Schill Road. This will ensure there are not bright lights each morning being powered up on equipment facing our neighbors. MCE will also look into limiting the degree of lighting from 6:00-6:45am as crews are arriving on site. We'll be sure to share updated details on this in the coming days.
- **NW Corner Berm:** We'll be looking into Dan's suggestion below and report back on this as well.
